LONCAR CANCER IMMUNOTHERAPY ETF SUMMARY

Investment Objective

The Loncar Cancer Immunotherapy ETF (the “Fund”) seeks to track the total return performance, before fees and expenses, of the Loncar Cancer Immunotherapy Index (the “Index”).

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. This table and the Example below do not include the brokerage commissions that investors may pay on their purchases and sales of Fund shares.

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.79%
Distribution and/or Service (12b-1) Fees	None
Other Expenses*	0.00%
Total Annual Fund Operating Expenses	<u>0.79%</u>

* Based on estimated amounts for the current fiscal year.

Expense Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year: \$81 **3 Years:** \$252

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

Principal Investment Strategies

The Fund uses a “passive management” (or indexing) approach to track the performance, before fees and expenses, of the Index.

Loncar Cancer Immunotherapy Index

The Index is composed of the common stock of approximately 30 pharmaceutical or biotechnology companies identified by Loncar Investments, LLC (“Loncar” or the “Index Provider”), the Fund’s index provider, as having a high strategic focus on the development of drugs that harness the body’s own immune system to fight cancer (“immunotherapy”). Loncar identifies companies with a high strategic focus on cancer immunotherapy (“Immunotherapy Companies”) based on whether they meet one or more of the following criteria:

- (i) The company has a cancer immunotherapy drug(s) approved by either the U.S. Food and Drug Administration or the European Medicines Agency;
- (ii) The company has a cancer immunotherapy drug(s) in the human stage of testing;
- (iii) The company has announced intentions to begin human stage testing of a cancer immunotherapy drug(s); or
- (iv) The company has announced an immunotherapy collaboration or partnership with a major pharmaceutical company.

The Index is constructed using an objective, rules-based methodology that begins with an initial universe of all pharmaceutical and biotechnology companies whose equity securities or American Depositary Receipts (“ADRs”) are listed on a U.S. exchange. The initial universe is then narrowed to include only those companies that have been determined by Loncar to be Immunotherapy Companies, that are not known to be under investigation by the SEC or any other government or regulatory entity, that have a minimum market capitalization of \$100 million, and that meet certain liquidity thresholds. The Index may include small-, mid-, and large-capitalization companies.

From the remaining companies, the Index Provider then selects (i) seven of the largest pharmaceutical Immunotherapy Companies, including the leading pharmaceutical company in each of the three most established and recognized categories of immunotherapy techniques (cell-based therapies, checkpoint inhibitors and targeted antibodies), plus the four other largest pharmaceutical Immunotherapy Companies, and (ii) the twenty-three largest biotechnology Immunotherapy Companies based on their market capitalization.

The Index is equal-weighted and is rebalanced and reconstituted on the third Tuesday of June and December. The Index was created by Loncar in March 2015 in anticipation of the commencement of operations of the Fund. Additional information about the Index is available on the Index Provider’s website at www.loncarindex.com.

The Fund’s Investment Strategy

The Fund attempts to invest all, or substantially all, of its assets in the component securities and ADRs that make up the Index. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of any collateral held from securities lending) will be invested in the component securities of the Index. Exchange Traded Concepts, LLC (“ETC” or the “Adviser”), the Fund’s investment adviser, expects that, over time, the correlation between the Fund’s performance and that of the Index, before fees and expenses, will be 95% or better.

The Fund will generally use a “replication” strategy to achieve its investment objective, meaning it generally will invest in all of the component securities of the Index. However, the Fund may use a “representative sampling” strategy, meaning it may invest in a sample of the securities in the Index whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole, when the Fund’s sub-adviser believes it is in the best interests of the Fund (e.g., when replicating the Index involves practical difficulties or substantial costs, an Index constituent becomes temporarily illiquid, unavailable or less liquid, or as a result of legal restrictions or limitations that apply to the Fund but not to the Index).

The Fund generally may invest up to 20% of its total assets (exclusive of any collateral held from securities lending) in securities or other investments not included in the Index, but which the Fund’s sub-adviser believes will help the Fund track the Index. For example, the Fund may invest in securities that are not components of the Index to reflect various corporate actions and other changes to the Index (such as reconstitutions, additions and deletions).

To the extent the Index concentrates (i.e., holds more than 25% of its total assets) in the securities of a particular industry or group of related industries, the Fund will concentrate its investments to approximately the same extent as the Index. The Fund is expected to concentrate in Immunotherapy Companies.

Principal Investment Risks

As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. The following risks could affect the value of your investment in the Fund:

- **ADR Risk.** ADRs involve risks similar to those associated with investments in foreign securities and certain additional risks. ADRs listed on U.S. exchanges are issued by banks or trust companies, and entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares (“Underlying Shares”). ADRs may not provide a return that corresponds precisely with that of the Underlying Shares.
- **Equity Market Risk.** The equity securities held in the Fund’s portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, sectors or companies in which the Fund invests. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change.
- **Foreign Companies Risk.** Investments in ADRs that provide exposure to securities traded in foreign markets involve substantial risk due to limited information; different accounting, auditing and financial reporting standards; or adverse political or economic developments.
- **Immunotherapy Companies Risk.** Immunotherapy Companies are highly dependent on the development, procurement and marketing of drugs and the protection and exploitation of intellectual property rights. A company’s valuation can also

be greatly affected if one of its products is proven or alleged to be unsafe, ineffective or unprofitable. The stock prices of Immunotherapy Companies have been and will likely continue to be very volatile.

The costs associated with developing new drugs can be significant, and the results are unpredictable. Newly developed drugs may be susceptible to product obsolescence due to intense competition from new products and less costly generic products. Moreover, the process for obtaining regulatory approval by the U.S. Food and Drug Administration or other governmental regulatory authorities is long and costly and there can be no assurance that the necessary approvals will be obtained or maintained.

Certain companies in which the Fund may invest are non-U.S. issuers whose securities or ADRs are listed on U.S. exchanges. The international operations of many Immunotherapy Companies expose them to risks associated with instability and changes in economic and political conditions, foreign currency fluctuations, changes in foreign regulations and other risks inherent to international business.

- **No Operating History.** The Fund is a recently organized, non-diversified management investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision.
- **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund's performance.
- **Passive Investment Risk.** The Fund is not actively managed and the Fund's sub-adviser would not sell shares of an equity security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the Index or the selling of shares of that security is otherwise required upon a reconstitution of the Index in accordance with the Index methodology.
- **Shares of the Fund May Trade at Prices Other Than Net Asset Value ("NAV").** As with all exchange traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the shares of the Fund will approximate the Fund's NAV, there may be times when the market price of the shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of the Fund's shares or during periods of market volatility. This risk is heightened in times of market volatility or periods of steep market declines.
- **Smaller Companies Risk.** The Fund may invest in the securities of smaller-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities of smaller-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Smaller-capitalization companies may be particularly sensitive to changes in interest rates, government regulation, borrowing costs and earnings.
- **Tax Risk.** To qualify for the favorable tax treatment generally available to regulated investment companies, the Fund must satisfy certain diversification requirements. In particular, the Fund generally may not acquire a security if, as a result of the acquisition, more than 50% of the value of the Fund's assets would be invested in (a) issuers in which the Fund has, in each case, invested more than 5% of the Fund's assets and (b) issuers more than 10% of whose outstanding voting securities are owned by the Fund. While the weighting of the Index is not inconsistent with these rules, given the concentration of the Index in a relatively small number of securities, it may not always be possible for the Fund to fully implement a replication strategy or a representative sampling strategy while satisfying these diversification requirements. The Fund's efforts to satisfy the diversification requirements may affect the Fund's execution of its investment strategy and may cause the Fund's return to deviate from that of the Index, and the Fund's efforts to replicate or represent the Index may cause it inadvertently to fail to satisfy the diversification requirements. If the Fund were to fail to satisfy the diversification requirements, it could incur penalty taxes and be forced to dispose of certain assets, or it could fail to qualify as a regulated investment company. If the Fund were to fail to qualify as a regulated investment company, it would be taxed in the same manner as an ordinary corporation, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income.
- **Tracking Error Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.

Performance

The Fund is new and therefore does not have a performance history for a full calendar year. In the future, performance information for the Fund will be presented in this section. Performance information is also available on the Fund's website at www.LoncarFunds.com.

Portfolio Management

Adviser	Exchange Traded Concepts, LLC
Sub-Adviser	Vident Investment Advisory, LLC ("VIA" or the "Sub-Adviser")
Portfolio Manager	Denise M. Krisko, CFA, President of the Sub-Adviser, has been the Fund's portfolio manager since its inception

Buying and Selling Shares

Shares of the Fund are listed on a national securities exchange, such as The NASDAQ Stock Market, LLC (the "Exchange"), and most investors will buy and sell shares of the Fund through brokers at market prices, rather than NAV. Because the shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks known as "Creation Units," which only Authorized Participants ("APs") (typically, broker-dealers) may purchase or redeem. Creation Units generally consist of 50,000 shares, though this may change from time to time. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities closely approximating the holdings of the Fund (the "Deposit Securities") and/or a designated amount of U.S. cash.

Dividends, Capital Gains and Taxes

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an individual retirement account ("IRA") or other tax-advantaged account.

Financial Intermediary Compensation

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT THE INDEX

From time to time, the Index may include more or less than 30 companies as a result of events such as acquisitions, spin-offs and other corporate actions.

Loncar is not affiliated with the Adviser, the Sub-Adviser, the Fund's distributor, or any of their respective affiliates. Loncar provides information to the Fund about the constituents of the Index and does not provide investment advice with respect to the desirability of investing in, purchasing or selling securities. The Adviser has entered into a licensing agreement with Loncar pursuant to which the Adviser pays a fee to use the Index. The Adviser is sub-licensing rights to the Index to the Fund at no charge.

The Index Calculation Agent is Indxx, LLC, which is not affiliated with the Fund, the Adviser, the Sub-Adviser, the Index Provider, or the Fund's distributor. The Index Calculation Agent provides information to the Fund about the constituents of the Index and does not provide investment advice with respect to the desirability of investing in, purchasing or selling securities.

ADDITIONAL INFORMATION ABOUT THE FUND

Investment Objective

The Fund's investment objective is a non-fundamental investment policy and may be changed without shareholder approval upon 60 days' written notice to shareholders.

Principal Investment Risks

As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. The following risks could affect the value of your investment in the Fund:

- **ADR Risk.** The issuers of certain ADRs are under no obligation to distribute shareholder communications to the holders of such receipts, or to pass through to them any voting rights with respect to the Underlying Shares. Investment in ADRs may be less liquid than the Underlying Shares, which could negatively affect the price the Fund can get when selling the ADRs. Alternatively, certain ADRs may be more liquid than the Underlying Shares, which may negatively affect the price of the ADRs if investors are consequently able to sell interests in the ADRs more quickly than interests in the Underlying Shares.
- **Equity Market Risk.** Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors including: expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, economic and banking crises. If you held common stock, or common stock equivalents, of any given issuer, you would generally be exposed to greater risk than if you held preferred stocks and debt obligations of the issuer because common stockholders, or holders of equivalent interests, generally have inferior rights to receive payments from issuers in comparison with the rights of preferred stockholders, bondholders, and other creditors of such issuers.
- **Foreign Companies Risk.** Investments in ADRs that provide exposure to securities traded in foreign markets involve substantial risk due to limited information; different accounting, auditing and financial reporting standards; or adverse political or economic developments. The securities markets of foreign countries may be substantially smaller, less developed, less liquid and more volatile than the major securities markets in the U.S..
- **Immunotherapy Companies Risk.** The success of Immunotherapy Companies is highly dependent on the development, procurement and marketing of drugs. The values of such companies are also dependent on the development, protection and exploitation of intellectual property rights and other proprietary information, and profitability may be significantly affected by such things as the expiration of patents or the loss of, or the inability to enforce, intellectual property rights. There can be no assurance that the steps taken by Immunotherapy Companies to protect their proprietary rights will be adequate to prevent misappropriation of their proprietary rights or that competitors will not independently develop products that are substantially equivalent or superior to such companies' products. Immunotherapy Companies also rely on trade secrets, know-how and technology, which are not protected by patents, to maintain their competitive position. If any trade secret, know-how or other technology not protected by a patent were disclosed to, or independently developed by, a competitor, that company's business and financial condition could be materially adversely affected.

The research and other costs associated with developing or procuring new drugs and the related intellectual property rights can be significant, and the results of such research and expenditures are unpredictable. There can be no assurance that those efforts or costs will result in the development of a profitable drug. Immunotherapy Companies may be susceptible to product obsolescence and face intense competition from new products and less costly generic products. Moreover, the process for obtaining regulatory approval by the U.S. Food and Drug Administration or other governmental regulatory authorities is long and costly and there can be no assurance that the necessary approvals will be obtained or maintained. Immunotherapy Companies are also subject to laws and regulations governing the protection of the environment and occupational health and safety, including laws regulating air emissions, wastewater discharges, the management and disposal of hazardous materials and wastes, and the health and safety of employees. Failure to comply with applicable domestic and/or foreign requirements can result in civil and criminal fines or other enforcement actions, recall or seizure of products, total or partial suspension of production, withdrawal of existing product approvals or clearances, refusal to approve or clear new applications or notifications, increased quality control costs, criminal prosecution, other penalties and, in some instances, exclusion of participation in government sponsored programs such as Medicare, Medicaid and other government sponsored programs.

There can be no assurance that any individual cancer immunotherapy drug will be effective or approved by the applicable regulatory agency. Consequently, there may be companies included in the Index that do not (and may never) generate significant revenue or profit from cancer immunotherapy products. Additionally, because the pharmaceutical companies included in the Index may be dependent on the sales of drugs other than cancer immunotherapy drugs, the performance of such companies may be adversely affected by factors unrelated to the market for cancer immunotherapy drugs.

Immunotherapy Companies are also subject to rapid and significant technological change and competitive forces that may make drugs obsolete or make it difficult to raise prices and, in fact, may result in price discounting. Immunotherapy

Companies may also be subject to expenses and losses from extensive litigation based on intellectual property, product liability and similar claims.

Immunotherapy Companies may be adversely affected by government regulation and changes in reimbursement rates. The ability of many such companies to commercialize current and any future products depends in part on the extent to which reimbursement for the cost of such products and related treatments are available from third party payors, such as Medicare, Medicaid and other government sponsored programs, private health insurance plans and health maintenance organizations. Third-party payors are increasingly challenging the price and cost-effectiveness of medical products. Significant uncertainty exists as to the reimbursement status of health care products, and there can be no assurance that adequate third-party coverage will be available for companies to obtain satisfactory price levels for their products.

The international operations of many Immunotherapy Companies expose them to risks associated with instability and changes in economic and political conditions, foreign currency fluctuations, changes in foreign regulations and other risks inherent to international business. Additionally, a company's valuation can often be based largely on the potential or actual performance of a limited number of products. A company's valuation can also be greatly affected if one of its products proves unsafe, ineffective or unprofitable. Immunotherapy Companies also may be characterized by thin capitalization and limited markets, financial resources or personnel, as well as dependence on wholesale distributors. The stock prices of Immunotherapy Companies have been and will likely continue to be very volatile. Some of the companies in the Index are engaged in other lines of business unrelated to immunotherapy, and they may experience problems with these lines of business which could adversely affect their operating results. The operating results of these companies may fluctuate as a result of these additional risks and events in the other lines of business. In addition, a company's ability to engage in new activities may expose it to business risks with which it has less experience than it has with the business risks associated with its traditional businesses. Despite a company's possible success in immunotherapy activities, there can be no assurance that the other lines of business in which these companies are engaged will not have an adverse effect on a company's business or financial condition.

Certain companies in which the Fund may invest are non-U.S. issuers whose securities or ADRs are listed on U.S. exchanges. These securities involve risks beyond those associated with investments in U.S. securities, including greater market volatility, higher transactional costs, the possibility that the liquidity of such securities could be impaired because of future political and/or economic developments, taxation by foreign governments, political instability, the possibility that foreign governmental restrictions may be adopted which might adversely affect such securities and that the selection of such securities may be more difficult because there may be less publicly available information concerning such non-U.S. issuers or the accounting, auditing and financial reporting standards, practices and requirements applicable to non-U.S. issuers may differ from those applicable to U.S. issuers

- **Market Capitalization Risk**

- **Large-Capitalization Investing.** The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
- **Mid-Capitalization Investing.** The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large capitalization stocks or the stock market as a whole. Some medium capitalization companies have limited product lines, markets, financial resources, and management personnel and tend to concentrate on fewer geographical markets relative to large-capitalization companies.
- **Small-Capitalization Investing.** The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of larger-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Some small capitalization companies have limited product lines, markets, and financial and managerial resources and tend to concentrate on fewer geographical markets relative to larger capitalization companies. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies. Small-capitalization companies also may be particularly sensitive to changes in interest rates, government regulation, borrowing costs and earnings.

- **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund

may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund's performance.

- **No Operating History.** The Fund is a recently organized, non-diversified management investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision.
- **Passive Investment Risk.** The Fund is not actively managed and the Sub-Adviser would not sell shares of an equity security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the Index or the selling of shares of that security is otherwise required upon a reconstitution of the Index in accordance with the Index methodology. The Fund invests in securities included in, or representative of securities included in, the Index, regardless of their investment merits. The Fund does not take defensive positions under any market conditions, including conditions that are adverse to the performance of the Fund.
- **Shares of the Fund May Trade at Prices Other Than NAV.** As with all ETFs, Fund shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the shares of the Fund will approximate the Fund's NAV, there may be times when the market price of the shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of the Fund's shares or during periods of market volatility. This risk is heightened in times of market volatility or periods of steep market declines. The market price of Fund shares during the trading day, like the price of any exchange-traded security, includes a "bid/ask" spread charged by the exchange specialist, market makers or other participants that trade the Fund shares. In times of severe market disruption, the bid/ask spread can increase significantly. At those times, Fund shares are most likely to be traded at a discount to NAV, and the discount is likely to be greatest when the price of Fund shares is falling fastest, which may be the time that you most want to sell your Fund shares. The Adviser believes that, under normal market conditions, large market price discounts or premiums to NAV will not be sustained because of arbitrage opportunities.
- **Tax Risk.** To qualify for the favorable tax treatment generally available to regulated investment companies, the Fund must satisfy certain diversification requirements. In particular, the Fund generally may not acquire a security if, as a result of the acquisition, more than 50% of the value of the Fund's assets would be invested in (a) issuers in which the Fund has, in each case, invested more than 5% of the Fund's assets and (b) issuers more than 10% of whose outstanding voting securities are owned by the Fund. While the weighting of the Index is not inconsistent with these rules, given the concentration of the Index in a relatively small number of securities, it may not always be possible for the Fund to fully implement a replication strategy or a representative sampling strategy while satisfying these diversification requirements. The Fund's efforts to satisfy the diversification requirements may affect the Fund's execution of its investment strategy and may cause the Fund's return to deviate from that of the Index, and the Fund's efforts to replicate or represent the Index may cause it inadvertently to fail to satisfy the diversification requirements. If the Fund were to fail to satisfy the diversification requirements, it could incur penalty taxes and be forced to dispose of certain assets, or it could fail to qualify as a regulated investment company. If the Fund were to fail to qualify as a regulated investment company, it would be taxed in the same manner as an ordinary corporation, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income.
- **Tracking Error Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.

PORTFOLIO HOLDINGS

Information about the Fund's daily portfolio holdings is available at www.LoncarFunds.com. A complete description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information ("SAI").

MANAGEMENT

Investment Adviser

Exchange Traded Concepts, LLC, serves as the investment adviser and has overall responsibility for the general management and administration of the Fund. ETC also arranges for sub-advisory, transfer agency, custody, fund administration, and all other non-distribution related services necessary for the Fund to operate. For the services it provides to the Fund, the Fund pays

ETC a unified management fee, which is calculated daily and paid monthly, at an annual rate of 0.79% of the Fund's average daily net assets. Under the investment advisory agreement, the Adviser has agreed to pay all expenses incurred by the Fund except for interest charges on any borrowings, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act and the unified management fee payable to ETC.

The Adviser, in turn, compensates the Sub-Adviser from the management fee it receives.

The Adviser has provided investment advisory services to individual and institutional accounts since 2009. The Adviser is an Oklahoma limited liability company and is located at 10900 Hefner Pointe Drive, Suite 207, Oklahoma City, Oklahoma 73120.

The basis for the Board of Trustees' approval of the Fund's Investment Advisory Agreement will be available in the Fund's first Semi-Annual or Annual Report to Shareholders.

Sub-Adviser

The Adviser has retained VIA to serve as sub-adviser. VIA is responsible for the day-to-day management of the Fund. VIA, a registered investment adviser, is a wholly-owned subsidiary of Vident Financial, LLC. Its principal office is located at 300 Colonial Center Parkway, Suite 330, Roswell, Georgia 30076. VIA was formed in 2014 and provides investment advisory services to ETFs, including the Fund. The Sub-Adviser is responsible for trading portfolio securities for the Fund, including selecting broker-dealers to execute purchase and sale transactions or in connection with any rebalancing or reconstitution of the Index, subject to the supervision of the Adviser and the Board. For its services, the Sub-Adviser is paid a fee by the Adviser calculated daily and based on the daily net assets of the Fund at an annual rate of 0.05%, subject to a minimum annual fee of \$15,000.

The basis for the Board of Trustees' approval of the Fund's Sub-Advisory Agreement will be available in the Fund's first Semi-Annual or Annual Report to Shareholders.

Management of the Fund's Sub-Adviser

The Fund and the Adviser have received exemptive relief from the U.S. Securities and Exchange Commission ("SEC") permitting the Adviser (subject to certain conditions and the Board's approval) to select or change sub-advisers without obtaining shareholder approval. The relief also permits the Adviser to materially amend the terms of agreements with a sub-adviser (including an increase in its fee) or to continue the employment of a sub-adviser after an event that would otherwise cause the automatic termination of services with Board approval, but without shareholder approval. Shareholders will be notified of any sub-adviser changes.

Portfolio Manager

Denise M. Krisko, CFA, is primarily responsible for the investment decisions for the Fund. Ms. Krisko became the President of the Sub-Adviser in November 2014 and has over nineteen years of investment management experience. Ms. Krisko was previously the Chief Investment Officer at Index Management Solutions, LLC ("IMS"). Prior to joining IMS, she was a Managing Director and Co-Head of the Equity Index Management and Head of East Coast Equity Index Strategies for Mellon Capital Management. She was also a Managing Director of The Bank of New York and Head of Equity Index Strategies for BNY Investment Advisors from August 2005 until the merger of The Bank of New York with Mellon Bank in 2007, when she assumed her role with Mellon Capital Management. Ms. Krisko attained the Chartered Financial Analyst ("CFA") designation in 2000. Ms. Krisko graduated with a BS from Pennsylvania State University and obtained her MBA from Villanova University.

The Fund's SAI provides additional information about the Portfolio Manager's compensation structure, other accounts managed by the Portfolio Manager, and the Portfolio Manager's ownership of shares in the Fund.

HOW TO BUY AND SELL SHARES

The Fund issues and redeems shares at NAV only in Creation Units. Only APs may acquire shares directly from the Fund, and only APs may tender their shares for redemption directly to the Fund, at NAV. APs must be (i) a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the NSCC, a clearing agency that is registered with the SEC; or (ii) a DTC participant (as discussed below). In addition, each AP must execute a Participant Agreement that has been agreed to by the Distributor, and that has been accepted by the Transfer Agent and the Trust, with

respect to purchases and redemptions of Creation Units. Once created, Fund shares trade in the secondary market in amounts less than a Creation Unit.

Most investors buy and sell shares of the Fund in secondary market transactions through brokers. Shares of the Fund are listed for trading on the secondary market on the Exchange and can be bought and sold throughout the trading day like other publicly traded shares.

When buying or selling Fund shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offer price in the secondary market on each leg of a round trip (purchase and sale) transaction. In addition, because secondary market transactions occur at market prices, you may pay more than NAV when you buy Fund shares, and receive less than NAV when you sell those shares.

The Fund's exchange trading or "ticker" symbol is listed on the cover of this Prospectus.

Book Entry

Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding shares of the Fund.

Investors owning Fund shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all shares of the Fund. DTC's participants include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Fund shares, you are not entitled to receive physical delivery of stock certificates or to have shares registered in your name, and you are not considered a registered owner of Fund shares. Therefore, to exercise any right as an owner of Fund shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book entry or "street name" through your brokerage account.

Share Trading Prices on the Exchange

Trading prices of shares of the Fund on the Exchange may differ from the Fund's daily NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Fund shares. To provide additional information regarding the indicative value of Fund shares, the Exchange or a market data vendor disseminates information every 15 seconds through the facilities of the Consolidated Tape Association or other widely disseminated means an updated "intraday indicative value" ("IIV") for Fund shares as calculated by an information provider or market data vendor. The Fund is not involved in or responsible for any aspect of the calculation or dissemination of the IIVs and makes no representation or warranty as to the accuracy of the IIVs. The basket of Deposit Securities does not necessarily reflect the precise composition of the current Fund portfolio at a particular point in time and the IIV based on that basket may not represent the best possible valuation of the Fund's portfolio. Therefore, the IIV should not be viewed as a "real-time" update of the Fund's NAV, which is computed only once a day, typically at the end of the business day. The IIV is generally determined by using both current market quotations and/or price quotations obtained from broker-dealers that may trade in the Deposit Securities.

Frequent Purchases and Redemptions of Shares

The Fund imposes no restrictions on the frequency of purchases and redemptions of Fund shares. In determining not to approve a written, established policy, the Board evaluated the risks of market timing activities by Fund shareholders. Purchases and redemptions by APs, who are the only parties that may purchase or redeem shares directly with the Fund, are an essential part of the ETF process and help keep Fund share trading prices in line with NAV. As such, the Fund accommodates frequent purchases and redemptions by APs. However, the Board has also determined that frequent purchases and redemptions for cash may increase tracking error and portfolio transaction costs and may lead to the realization of capital gains. To minimize these potential consequences of frequent purchases and redemptions, the Fund employs fair value pricing and imposes transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Fund in effective trades. In addition, the Fund and the Adviser reserve the right to reject any purchase order at any time.

Determination of Net Asset Value

The Fund's NAV is calculated as of the close of regular trading on the Exchange, generally 4:00 p.m. Eastern Time, each day the Exchange is open for business. The NAV is calculated by dividing the Fund's net assets by its shares outstanding.

In calculating its NAV, the Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. If such information is not available for a security held by the Fund or is determined to be unreliable, the security will be valued at fair value estimates under guidelines established by the Board (as described below).

Fair Value Pricing

The Board has adopted procedures and methodologies to fair value Fund securities whose market prices are not “readily available” or are deemed to be unreliable. For example, such circumstances may arise when: (i) a security has been de-listed or has had its trading halted or suspended; (ii) a security’s primary pricing source is unable or unwilling to provide a price; (iii) when a security’s primary trading market is closed during regular market hours; or (iv) when a security’s value is materially affected by events occurring after the close of the security’s primary trading market. Generally, when fair valuing a security, the Fund will take into account all reasonably available information that may be relevant to a particular valuation including, but not limited to, fundamental analytical data regarding the issuer, information relating to the issuer’s business, recent trades or offers of the security, general and/or specific market conditions and the specific facts giving rise to the need to fair value the security. Fair value determinations are made in good faith and in accordance with the fair value methodologies included in the Board-adopted valuation procedures. Due to the subjective and variable nature of fair value pricing, there can be no assurance that the Adviser or Sub-Adviser will be able to obtain the fair value assigned to the security upon the sale of such security.

Investments by Registered Investment Companies

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies, including shares of the Fund. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in section 12(d)(1), subject to certain terms and conditions set forth in an SEC exemptive order issued to the Trust, including that such investment companies enter into an agreement with the Fund.

DIVIDENDS, DISTRIBUTIONS AND TAXES

Dividends and Distributions

The Fund intends to pay out dividends, if any, and distribute any net realized capital gains to its shareholders at least annually. The Fund is authorized to declare and pay capital gain distributions in shares of the Fund (“Shares”) or in cash. Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

Taxes

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-advantaged account, such as an IRA plan, you need to be aware of the possible tax consequences when: (i) the Fund makes distributions; (ii) you sell your Shares listed on the Exchange; and (iii) you purchase or redeem Creation Units.

Taxes on Distributions

For federal income tax purposes, distributions of investment income are generally taxable as ordinary income or qualified dividend income. Taxes on distributions of capital gains (if any) are determined by how long the Fund owned the investments that generated them, rather than how long a shareholder has owned his or her Fund Shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions of the Fund’s net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are reported by the Fund as capital gain dividends (“Capital Gain Dividends”) will be taxable as long-term capital gains, which for noncorporate shareholders are subject to tax at reduced rates. Distributions of short-term capital gain will generally be taxable as ordinary income. Distributions reported by the Fund as “qualified dividend income” are generally taxed to noncorporate shareholders at rates applicable to long-term capital gains, provided holding period and other requirements are met. A portion of dividends received from the Fund (but none of the Fund’s capital gain distributions) may qualify for the dividends-received deduction for corporations.

U.S. individuals with income exceeding specified thresholds are subject to a 3.8% Medicare contribution tax on all or a portion of their “net investment income,” which includes interest, dividends, and certain capital gains (including capital gains distributions and capital gains realized on the sale of Shares). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable even if they are paid from income or gains earned by the Fund before your investment (and thus were included in the Shares' NAV when you purchased your Shares).

If you are neither a resident nor a citizen of the United States or if you are a foreign entity, distributions (other than Capital Gain Dividends) paid to you by the Fund will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies.

The Fund (or a financial intermediary, such as a broker, through which a shareholder owns Shares) generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has underreported dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding.

Taxes When Shares are Sold on the Exchange

Any capital gain or loss realized upon a sale of Shares generally is treated as a long-term capital gain or loss if the Shares have been held for more than one year and as a short-term capital gain or loss if the Shares have been held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent of Capital Gain Dividends were paid with respect to such Shares. The ability to deduct capital losses may be limited.

Taxes on Purchases and Redemptions of Creation Units

An AP having the U.S. dollar as its functional currency for U.S. federal income tax purposes who exchanges securities for Creation Units generally recognizes a gain or a loss. The gain or loss will be equal to the difference between the value of the Creation Units at the time of the exchange and the exchanging AP's aggregate basis in the securities delivered plus the amount of any cash paid for the Creation Units. A person who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanging AP's basis in the Creation Units and the aggregate U.S. dollar market value of the securities received, plus any cash received for such Creation Units. The Internal Revenue Service may assert, however, that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as a short-term capital gain or loss if the Shares have been held for one year or less.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to state and local tax on Fund distributions and sales of Shares. Consult your personal tax advisor about the potential tax consequences of an investment in Shares under all applicable tax laws. For more information, please see the section entitled "Federal Income Taxes" in the SAI.

DISTRIBUTION

The Distributor, Quasar Distributors, LLC, is a broker-dealer registered with the U.S. Securities and Exchange Commission. The Distributor distributes Creation Units for the Fund on an agency basis and does not maintain a secondary market in Fund shares. The Distributor has no role in determining the policies of the Fund or the securities that are purchased or sold by the Fund. The Distributor's principal address is 615 East Michigan Street, 4th Floor, Milwaukee, Wisconsin 53202.

The Board has adopted a Distribution and Service Plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act. In accordance with the Plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year for certain distribution-related activities and shareholder services.

No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of the Fund's assets, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

PREMIUM/DISCOUNT INFORMATION

The Fund is new and therefore does not have any information regarding how often Shares traded on the Exchange at a price above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund.

ADDITIONAL NOTICES

Shares of the Fund are not sponsored, endorsed, or promoted by the Exchange. The Exchange makes no representation or warranty, express or implied, to the owners of the shares of the Fund or any member of the public regarding the ability of the Fund to track the total return performance of the Index or the ability of the Index identified herein to track the performance of its constituent securities. The Exchange is not responsible for, nor has it participated in, the determination of the compilation or the calculation of the Index, nor in the determination of the timing of, prices of, or quantities of the shares of the Fund to be issued, nor in the determination or calculation of the equation by which the shares are redeemable. The Exchange has no obligation or liability to owners of the shares of the Fund in connection with the administration, marketing, or trading of the shares of the Fund.

The Exchange does not guarantee the accuracy and/or the completeness of the Index or the data included therein. The Exchange makes no warranty, express or implied, as to results to be obtained by the Fund, owners of the shares, or any other person or entity from the use of the Index or the data included therein. The Exchange makes no express or implied warranties, and hereby expressly disclaims all warranties of merchantability or fitness for a particular purpose with respect to the Index or the data included therein. Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

FINANCIAL HIGHLIGHTS

Financial information for the Fund will be available after the Fund has completed a fiscal year of operations.
